

Rapatac

Activity Centre Nordost

The intention of the Rapatac concept is to provide the right conditions for a secure and meaningful growth for children and youth.

At the Activity Centre Nordost, both children and young people as well as people living in the residential area are offered support, safety and dialogue; a guidance to a meaningful life. This is a meetingpoint where problemsolving and motivation are key points in our work to promote the local integration and discourage preconceptions, discrimination, exclusion, crime and segregation.

Through the activities, Rapatac provide the children and young people a good foundation in life and a positive vision of the future.

It is of great importance that the children are surrounded by role models who acknowledge to every child and emphasize their significance in the spirit of togetherness. The fellowship in which the trust in both their own and their fellow friends' ability are strengthened and maintained.

In collaboration with well-established local actors such as organizations, authorities, companies and associations, Rapatac offers a new way and approach to social development.

Activities

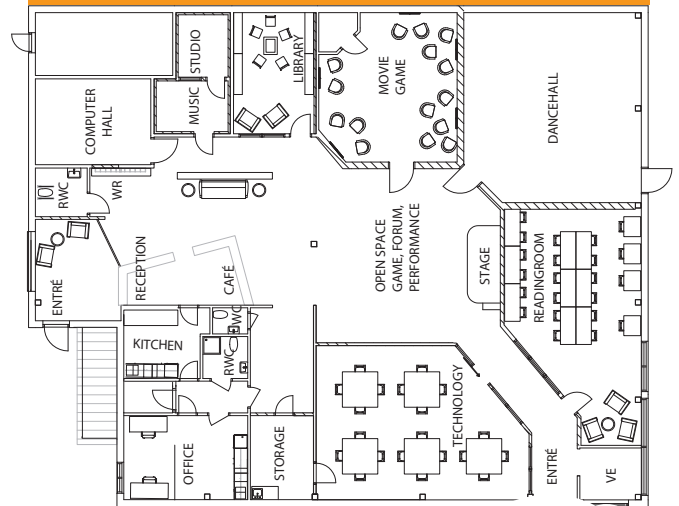

- **Homework support** – Homework is an important part of children's school attendance and this is when the children have a possibility to extend their days of school as well as rehearse and deepen their knowledge. This is why the children will have access to a reading room where support will be provided by academic role models before the children moves on to other activities provided in the centre. The homework activity will work as a collaboration and link between the schools and the Activity Centre.
- **Rapatec** – Rapatac are now making an engagement to broaden the technical education and encourage young people to technical curiosity and confidence through laborations, constructions and exercises in a playfull way. Under the guidance and support of particular our sponsored partner Korsnäs AB, fantasy is used as fuel to attain really cool results.
- **Music and Poetry** – Sounds and languages is an important part of human communication. The children and the young people are offered to express their thoughts and emotions through music, song and lyric. There is also an opportunity to sing, rehearse and record their own music in a studio.
- **Culture and Media** – In the custom media rooms are there opportunities to work with media and computers in various forms such as editing images and photos, pulishing own newspapers or magazines, and recording/editing self-produced movies or television programs. The activities are also specifically designed to challenge kids of all ages in order to raise the awareness of different perspectives.
- **Dance and Theatre** – Movements is a creative form of expression where you become aware of your body. Rapatac offers a diversity of dance styles and theatrical exercises, which forms a good self-confidence and trust through self-created productions and dance performances.
- **Café** – The café is run by the kids in order to wake a curiosity about their own entrepreneurship. The focus here is to offer alternatives to eat right "green and healthy, food and drink".

Preventive activities

Rapatac Activity Centre Nordost leaves a lot of other opportunities to create several activities and projects. We see a great advantage of local actors in the community develop a partnership. This collaboration may promote several long-term education and integration projects in order to deepen the understanding. A more healthy population will both improve the standards of living and imply a significant socioeconomic savings. The centre is also creating a proximity to the participants and an opportunity to meet other people to share knowledge and experience with, which in turn creates a sense of togetherness and appreciation.
